EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Thomas Perkowski on 7/16/2010.

2. The application has been amended as follows:

Claim 502 (currently amended): The Web-based EC-enabled shopping network of Claim ~~499~~ 499, wherein said CPI link structure further comprises, for each said consumer product,

(iii) a Trademark (TM) assigned to said consumer product;

(iv) a Product Descriptor (PD) associated with said consumer product; and

(v) a set of display attributes associated with each CPI resource in said CPI link structure.

Allowable Subject Matter

3. Claims 478-484, 488-510 are allowed.

4. The following is an examiner's statement of reasons for allowance:

Stern (US6591247) and Durst, Jr. et al (US6542933) represent the closest prior art. Of particular note, Stern teaches networked, in-store kiosks that deliver product information and advertisements when UPC-indexed product codes are scanned by users, as well as a central server to deliver such content. Of particular note, Durst, Jr. et al teaches a consumer scanning a barcode (UPC) at a kiosk in order to request delivery of more information on that identified/indexed product. However, neither nor the combination teach the details of applicant's independent claims 478, 490 or 499, which each require at least the features of:

- E-commerce servers with HTML pages of consumer products
- the first subsystem, allowing creation and management of CPI link structures (e.g. URLs)
- second subsystem allowing creation and deployment of MMVKs which include a server side component and a MMVK tag that references the component and is embedded in an HTML page
- a GUI of independently programmable display modes including a plurality from: advertising display mode, promotional display mode and brand information network (BIN) menu display mode
- a plurality of servers storing the mode content subsystem that allows independent programming of the set of brand information resources displayable during the BIN menu display mode
- third subsystem allowing independent programming of the advertising and promotion modes

- a browser to process the embedded MMVK tag
- server to automatically execute the server side component
- server configured to invite and allow consumer review and interaction with the advertising, promotions and brand information resources displayed within the GUI of the MMVK

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
